## Science and Genesis 1: Evidence of God

Dr. Ronald P. Reitz believes that there is a popular misconception that must be dispelled: the idea that science has somehow disproven the Biblical account found in Genesis Chapter 1. To dispel this misconception, Reitz first presents the scientific evidence about Earth's history. He notes that science tells us of a specific sequence of events that began 5 billion years ago. This sequence of events finally led up to the appearance of man on Earth. Reitz then compares this scientific account with the account given in Genesis chapter 1. He first lays the groundwork for analyzing the Genesis 1 account. He then proceeds with a thorough examination of Genesis 1, analyzes it and thereafter draws logical conclusions based upon his analysis. He demonstrates that the sequence of events that Science says happened is the same sequence of events given in the Genesis chapter 1 account. He then arrives at this shocking conclusion: For the first time in human history, science actually confirms an occurrence of Divine Revelation. Reitz then shows how this conclusion affects our philosophical world view.

Dr. Reitz then presents his views on the Christian faith and our attitude toward God. He presents the gospel message as he best understands it.

There is still much more to this book. Reitz deals with the question of how God made man, deals with the questions of Evolution vs. Creationism and even gives us a brief summary of the "Roadmap to the End-Times". In one of the appendices, Reitz presents the theory of relativity in a way that is understandable to people who are not steeped in the sciences. He then shows how this affects our view of time and space. He then draws conclusions about how a Spirit may view time. Reitz presents his evidence in a way that only a physicist can. Whether or not you believe in God, Reitz presents a compelling case for the existence of God...not just any God...but this God, the God of the Bible.
