Phosphor Handbook (Laser & Optical Science & Technology)

specification of physical and optical requirements for all applications of phosphors in lighting and display technologies

Japanese industry has and will continue to play a key role in developing these applications, and many contributors to this volume acted as principals in the progress discussed.

Display technologies will increase in importance, and no cohesive or comprehensive treatise exists - from basic to applied - on the nature, properties, synthesis, characterization, manufacture, and handling of phosphor materials in lighting and display technologies and applications. This exceptional handbook rectifies this deficiency, serving as the defining resource for all those engaged in research or in the application of phosphor materials - regardless of whether they are newcomers or veterans in this endeavor.
