NOTE: You are purchasing a standalone product; MasteringChemistry does not come packaged with this content. If you would like to purchase both the physical text and **MasteringChemistry** search for ISBN-10: **0321839765**/ISBN-13: **9780321839763**. That package includes ISBN-10: **0133871975** /ISBN-13: **9780133871975** and ISBN-10: **0321839927**/ISBN-13: **9780321839923**.

For one or two semester biochemistry courses (science majors).

A highly visual, precise and fresh approach to guide today's mixed-science majors to a deeper understanding of biochemistry

Biochemistry: Concepts and Connections engages students in the rapidly evolving field of biochemistry, better preparing them for the challenges of 21st century science through quantitative reasoning skills and a rich, chemical perspective on biological processes.

This concise first edition teaches mixed-science-majors the chemical logic underlying the mechanisms, pathways, and processes in living cells through groundbreaking biochemical art and a clear narrative that illustrates biochemistry's relation to all other life sciences. Integration of biochemistry's experimental underpinnings alongside the presentation of modern techniques encourages students to appreciate and consider how their understanding of biochemistry can and will contribute to solving problems in medicine, agricultural sciences, environmental sciences, and forensics.

The text is fully integrated with MasteringChemistry to provide support for students before, during, and after class. Highlights include interactive animations and tutorials based on the textbook's biochemical art program and Foundation Figures to help students visualize complex processes, apply, and test conceptual understanding as well as quantitative reasoning.

Also available with MasteringChemistry[®]

MasteringChemistry from Pearson is the leading online homework, tutorial, and assessment system, designed to improve results by engaging students before, during, and after class with powerful content. Instructors ensure students arrive prepared by assigning interaction with relevant biochemical concepts before class, and encourage critical thinking, visualization, and retention with in-class resources such as Learning Catalytics[™]. Students can further master concepts after class by interacting with biochemistry animations, problem sets, and tutorial assignments that provide hints and answer-specific feedback. The Mastering gradebook records scores for all automatically graded assignments in one place, while diagnostic tools give instructors access to rich data to assess student understanding and misconceptions.

Mastering brings learning full circle by continuously adapting to each student and making learning more personal than ever—before, during, and after class.

From reader reviews:

Peter Clark:

Here thing why that Biochemistry: Concepts and Connections are different and reliable to be yours. First of all examining a book is good however it depends in the content of computer which is the content is as delicious as food or not. Biochemistry: Concepts and Connections giving you information deeper since different ways, you can find any guide out there but there is no guide that similar with Biochemistry: Concepts and Connections. It gives you thrill reading journey, its open up your personal eyes about the thing in which happened in the world which is perhaps can be happened around you. It is possible to bring everywhere like in park, café, or even in your way home by train. When you are having difficulties in bringing the branded book maybe the form of Biochemistry: Concepts and Connections in e-book can be your choice.

Richard Cassidy:

People live in this new day time of lifestyle always aim to and must have the extra time or they will get lots of stress from both day to day life and work. So , when we ask do people have time, we will say absolutely indeed. People is human not really a huge robot. Then we request again, what kind of activity do you have when the spare time coming to you of course your answer will probably unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative with spending your spare time, the particular book you have read is Biochemistry: Concepts and Connections.

Daniel Moore:

Do you have something that you prefer such as book? The publication lovers usually prefer to pick book like comic, brief story and the biggest an example may be novel. Now, why not hoping Biochemistry: Concepts and Connections that give your pleasure preference will be satisfied by means of reading this book. Reading practice all over the world can be said as the method for people to know world considerably better then how they react towards the world. It can't be said constantly that reading routine only for the geeky individual but for all of you who wants to end up being success person. So , for all of you who want to start reading through as your good habit, you may pick Biochemistry: Concepts and Connections become your own personal starter.

Richard Ortega:

Many people spending their time period by playing outside using friends, fun activity having family or just watching TV 24 hours a day. You can have new activity to pay your whole day by looking at a book. Ugh, ya think reading a book will surely hard because you have to use the book everywhere? It okay you can have the e-book, bringing everywhere you want in your Smartphone. Like Biochemistry: Concepts and Connections which is obtaining the e-book version. So , why not try out this book? Let's see.
