Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering)

W Sha, Xiaomin Wu, K G Keong

Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering) W Sha, Xiaomin Wu, K G Keong

Unlike electroplating, electroless plating allows uniform deposits of coating materials over all surfaces, regardless of size, shape and electrical conductivity. Electroless copper and nickel-phosphorus deposits provide protective and functional coatings in industries as diverse as electronics, automotive, aerospace and chemical engineering. This book discusses the latest research in electroless depositions.

After an introductory chapter, part one focuses on electroless copper depositions reviewing such areas as surface morphology and residual stress, modelling surface structure, adhesion strength of electroless copper deposit, electrical resistivity and applications of electroless copper deposits. Part two goes on to look at electroless nickel-phosphorus depositions with chapters on the crystallisation of nickel-phosphorus deposits, modelling the thermodynamics and kinetics of crystallisation of nickel-phosphorus deposits, artificial neural network (ANN) modelling of crystallisation temperatures, hardness evolution of nickel-phosphorus deposits and applications of electroless nickel-phosphorus plating.

Written by leading experts in the field Electroless copper and nickel-phosphorus plating: Processing, characterisation and modelling is an invaluable guide for researchers studying electroless deposits or materials science as well as for those working in the chemical, oil and gas, automotive, electronics and aerospace industries.

- Written by leading experts in the field, this important book reviews the deposition process and the key properties of electroless copper and nickel-phosphorus deposits as well as their practical applications
- Chapters review areas such as surface morphology and residual stress, modelling surface structure, crystallisation of nickel-phosphorus deposits and hardness evolution
- An invaluable guide for researchers studying electroless deposits or materials science as well as for those working in the chemical, oil and gas, automotive, electronics and aerospace industries

From reader reviews:

Pam Wright:

Hey guys, do you want to find a new book to study? Maybe the book with the concept Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering) suitable to you? Often the book was written by famous writer in this era. The book titled Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering) is one of several books that everyone reads now. This book has inspired a number of people in the world. When you read this guide you will enter the new dimensions that you never knew just before. The author explained their concept in a simple way, so all of people can easily recognise the core of this guide. This book will give you a wide range of information about this world now. To help you see the represented of the world within this book.

Amanda Moberly:

Reading a publication tends to be new life style within this era globalization. With looking at you can get a lot of information that will give you benefit in your life. Along with book everyone in this world may share their idea. Ebooks can also inspire a lot of people. Lots of author can inspire their particular reader with their story or even their experience. Not only the story that share in the publications. But also they write about the data about something that you need illustration. How to get the good score toefl, or how to teach your kids, there are many kinds of book which exist now. The authors on this planet always try to improve their expertise in writing, they also doing some study before they write to the book. One of them is this Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering).

Johnny Rogowski:

Spent a free time and energy to be fun activity to do! A lot of people spent their sparetime with their family, or their particular friends. Usually they carrying out activity like watching television, going to beach, or picnic from the park. They actually doing ditto every week. Do you feel it? Do you wish to something different to fill your own personal free time/ holiday? Can be reading a book could be option to fill your cost-free time/ holiday. The first thing that you'll ask may be what kinds of publication that you should read. If you want to test look for book, maybe the book titled Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering) can be very good book to read. Maybe it is usually best activity to you.

Roxie Gregory:

As a student exactly feel bored to be able to reading. If their teacher asked them to go to the library or make summary for some reserve, they are complained. Just little students that has reading's internal or real their

pastime. They just do what the professor want, like asked to the library. They go to presently there but nothing reading significantly. Any students feel that looking at is not important, boring in addition to can't see colorful photographs on there. Yeah, it is being complicated. Book is very important for yourself. As we know that on this era, many ways to get whatever we want. Likewise word says, many ways to reach Chinese's country. Therefore this Electroless Copper and Nickel-Phosphorus Plating: Processing, Characterisation and Modelling (Woodhead Publishing Series in Metals and Surface Engineering) can make you feel more interested to read.
