**Godwired: Religion, Ritual and Virtual Reality (Media, Religion and Culture)** Rachel Wagner

*Godwired* offers an engaging exploration of religious practice in the digital age. It considers how virtual experiences, like stories, games and rituals, are forms of world-building or "cosmos construction" that serve as a means of making sense of our own world. Such creative and interactive activity is, arguably, patently religious.

This book examines:

- the nature of sacred space in virtual contexts
- technology as a vehicle for sacred texts
- who we are when we go online
- what rituals have in common with games and how they work online
- what happens to community when people worship online
- how religious "worlds" and virtual "worlds" nurture similar desires.

Rachel Wagner suggests that whilst our engagement with virtual reality can be viewed as a form of religious activity, today's virtual religion marks a radical departure from traditional religious practice – it is ephemeral, transient, rapid, disposable, hyper-individualized, hybrid, and in an ongoing state of flux.
