Handbook of the Biology of Aging

Handbook of the Biology of Aging

General Description of the Series

Each volume in the **Handbooks of Aging** Series represents one of the three main influences on aging: the **Handbook of the Biology of Aging**, **Handbook of the Psychology of Aging**, and **Handbook of Aging and the Social Sciences**. Each of the **Handbooks** presents critical comprehensive reviews of research knowledge, theories, concepts, and issues by the foremost scholars in the field. Chapters are selected to portray discrete units of research study, long-standing areas of research, and new developments.

General Description of the Volume

The Fourth Edition of the **Handbook of the Biology of Aging** continues the tradition of providing a comprehensive overview of some of the most important topics in biomedical gerontology. It updates issues examined in previous editions and covers new advances in geriatric medicine and the neurobiology of aging. The **Handbook** is of interest to biologists involved in aging research, geriatricians, medical researchers, psychologists, sociologists, and practitioners dealing with an aging population.

Key Features

- * Provides new insight into the aging of the nervous, neuroendocrine, cardiovascular, and immune systems
- * Examines in more detail the molecular biology of aging
- * Features new chapters on menopause and neuropsychological assessment of cognitive abilities
