Neurologie (French Edition) Jean Cambier, Maurice Masson, Catherine Masson, Henri Dehen

Les avancées rapides survenues dans tous les domaines des neurosciences imposaient une **nouvelle édition profondément révisée** de l'Abrégé de Neurologie. Chaque chapitre a été revu. Les remaniements les plus importants portent sur les chapitres relatifs à la pathologie : maladie de Parkinson, SEP, démences, pathologie vasculaire cérébrale, maladie d'Alzheimer, anomalies du développement.

Toutefois, l'esprit dans lequel avait été rédigé cet ouvrage - clair, pratique et complet - a été conservé : la place accordée à la **neurologie clinique** et à la **neuropsychologie** a été maintenue, de même que le souci d'intégrer la **sémiologie** dans l'organisation structurale et physiologique du système nerveux. Les **stratégies diagnostiques** ont été reconsidérées à la lumière des progrès de l'**imagerie**, de l'**électrophysiologie** et de la **neurogénétique**. La **thérapeutique** a été mise à jour dans l'ensemble des chapitres. **L'abrégé de référence entièrement mis à jour**

- Les troubles neurologiques selon une **analyse sémiologique** reposant sur l'anatomo-physiologie et intégrant les progrès de la neuropsychologie et de la neurogénétique
- Les affections neurologiques les plus fréquentes et les **thérapeutiques les plus récentes**
- Le diagnostic neurologique à la lumière des progrès de l'**imagerie médicale** et des **explorations électrophysiologiques de la neurogénétique**.
