Excerpt from The Modern Treatment of Stone in the Bladder: A Description of the Operation and Instruments, With Cases Illustrative of the Difficulties and Complications Met With

In this little work I aim at placing before my professional brethren a guide to the modern treatment of stone by litholapaxy of a thoroughly practical character. In addition to a detailed description of Bigelow's operation and the instruments employed therein, I have devoted particular attention to the difficulties and complications met with, and illustrated these, and what I consider the best means of dealing with them, by detailed cases from my own practice, now extending to more than six hundred cases of this operation.

The present edition has been thoroughly revised; a new chapter is added, giving details of those precautions necessary in the operation as applied to male children, and to females of all ages; and some difficulties untouched in the former edition - notably, the removal of encysted calculus by the modern operation - are described and illustrated.

A new method of diagnosis for small calculi, first brought to the notice of the profession by me in 1884, is illustrated and elaborated.

About the Publisher

Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at www.forgottenbooks.com

This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
