**ADHD Rating Scale--IV (for Children and Adolescents): Checklists, Norms, and Clinical Interpretation** George J. DuPaul PhD, Thomas J. Power PhD ABPP, Arthur D. Anastopoulos PhD, Robert Reid PhD

The ADHD Rating Scale-IV is a reliable and easy-to-administer instrument both for diagnosing ADHD in children and adolescents and for assessing treatment response. Containing 18 items, the scale is linked directly to DSM-IV diagnostic criteria for ADHD. This convenient 8 1/2 x 11" lay-flat manual provides three versions of the scale: a parent questionnaire on home behaviors (English), a parent questionnaire on home behaviors (Spanish), and a teacher questionnaire on classroom behaviors. Pages are formatted for easy photocopying, and permission to reproduce the scale as often as needed is included in the purchase price.

This manual also incorporates the following essential features that never before have been published in full:

- \* Information on the scale's development and how to use it
- \* Scoring profiles for boys and girls aged 5-17
- \* Nationally representative norms for both parent and teacher ratings
- \* Factor analysis data and findings on reliability and validity
- \* Clinical interpretation guidelines for screening and diagnosis
- \* Clinical interpretation guidelines for treatment evaluation

## QUICK VIEW

**What does it do?:** Quickly determines the frequency of ADHD symptoms.

**Age Range:** 5-17

**Administration Time:** 5-7 minutes

**Format:** Parent-report and teacher-report rating scales (includes parent form in English and Spanish).
