## **Conics (Dolciani Mathematical Expositions) Keith Kendig**

A CD containing 36 applets packaged with the book. This book engages the reader in a journey of discovery through a spirited discussion among three characters: Philosopher, Teacher and Student. Throughout the book, Philosopher pursues his dream of a unified theory of conics, where exceptions are banished. With a helpful teacher and example-hungry student, the trio soon finds that conics reveal much of their beauty when viewed over the complex numbers. In their odyssey, they uncover a goldmine of unsuspected results. They experience a series of "Aha!" moments as they stumble upon living brothers to familiar conics objects like foci and directrices. They also discover a normally-unseen ellipse spanning the gap between the branches of any hyperbola. On the applied side, they learn how two interfering wave sources create systems of hyperbolas; these are used in making astonishingly precise astronomical observations. All these discoveries are profusely illustrated with pictures, worked-out examples, a generous selection of exercises, and a CD containing 36 applets. If you've ever needed a conics formula for area, eccentricity, curvature and the like, look in the formula appendix. Here are dozens of useful formulas-a set for each of eight different ways of looking at a conic: as a cone slice; as the path of a planet moving under the influence of a fixed sun; constructed using two stakes and string; plus five other sets. CONICS is written in an easy, conversational style, and many historical tidbits and other points of interest are scattered throughout the text. Many students can self-study the book without outside help. This book is ideal for anyone having a little exposure to linear algebra and complex numbers. System Requirements for running the applets 128 MB of RAM Windows: Pentium 4: Windows NT/2000, or Windows XP Macintosh: G4 or G5 processor: Mac OS X v. 10.3.4 or later Safari browser recommended for the Mac

### **From reader reviews:**

#### **Jill Davis:**

What do you think about book? It is just for students as they are still students or this for all people in the world, what the best subject for that? Merely you can be answered for that issue above. Every person has various personality and hobby for each and every other. Don't to be forced someone or something that they don't want do that. You must know how great and also important the book Conics (Dolciani Mathematical Expositions). All type of book would you see on many sources. You can look for the internet options or other social media.

#### **Myrtle Galloway:**

In this 21st one hundred year, people become competitive in every single way. By being competitive currently, people have do something to make these people survives, being in the middle of the crowded place and notice by means of surrounding. One thing that often many people have underestimated the item for a while is reading. Yes, by reading a guide your ability to survive boost then having chance to stay than other is high. In your case who want to start reading any book, we give you this specific Conics (Dolciani Mathematical Expositions) book as beginner and daily reading e-book. Why, because this book is usually more than just a book.

#### **Keith Dunn:**

People live in this new day of lifestyle always aim to and must have the time or they will get large amount of stress from both day to day life and work. So , if we ask do people have free time, we will say absolutely yes. People is human not a robot. Then we ask again, what kind of activity do you have when the spare time coming to a person of course your answer will probably unlimited right. Then ever try this one, reading textbooks. It can be your alternative inside spending your spare time, often the book you have read is usually Conics (Dolciani Mathematical Expositions).

#### **Lee Wing:**

As a student exactly feel bored in order to reading. If their teacher inquired them to go to the library in order to make summary for some e-book, they are complained. Just small students that has reading's heart and soul or real their pastime. They just do what the educator want, like asked to the library. They go to there but nothing reading critically. Any students feel that examining is not important, boring and can't see colorful pics on there. Yeah, it is to be complicated. Book is very important for you. As we know that on this period, many ways to get whatever we want. Likewise word says, ways to reach Chinese's country. So , this Conics (Dolciani Mathematical Expositions) can make you feel more interested to read.
