International Classification of HRCT for Occupational and Environmental Respiratory Diseases

International Classification of HRCT for Occupational and Environmental Respiratory Diseases

Many international experts collaborated in creating this groundbreaking work, a principal-coding system, and in developing reference films and imaging parameters for the **International Classification of HRCT for Occupational and Environmental Respiratory Diseases**. The book is an authoritative guide to the recognition of dust diseases of the lung, using radiological imaging techniques, with special emphasis on high-resolution computerized tomography (CT). The classification is a powerful, essential tool for recording patient data on CT in a globally standardized semiquantitative way. The system is also applicable to surveillance and screening for occupational and environmental respiratory diseases. The book is a valuable resource not only for radiologists but for all who work in occupational medicine and public health.
