"This is an excellent text which covers all of the important research methods in the field, including randomised control trials. A strong component of the text is the inclusion of chapters on ethics and the future of paramedic research... The use of paramedic examples throughout the chapters will help students and other budding paramedic researchers connect with the subject matter and help them link theory, evidence and practice."

Professor Peter O'Meara, La Trobe Rural Health School, La Trobe University, Australia
