Excerpt from A Manual of the Mollusca: A Treatise on Recent and Fossil Shells Late, and Fossil Min, and Geol, Assistant, British Museum, With Numerous Illustrations

This Manual, which for six years occupied the Author's unceasing attention, was intended as a companion to Gen. Portlock's Geology ;and the desire to make it worthy of that association led to an amount of labour and expense which only a very extended circulation will repay.

The plan and title were taken from the "Manuel des Mollusques" of M.Sander Rang, incomparably the best work of its kind - for an acquaintance with which the author was indebted to his friend and master, William Lonsdale - the founder of the "Devonian System" in Geology.

On the subject of classification and nomenclature the Author followed the advice and example of his former colleague in the Geological Society, the late Prof. Edward Forbes ;without whose approval he seldom added to, or deviated from, the practice and plan of the "History of British Mollusca."

That he was right in taking this course, has been sanctioned by the highest authority in this country; - since the same scheme has been employed by Prof. Owen in the Hunterian Lectures and Catalogue. It has also been adopted by Dr. E.Baleoue in the Madras Museum; by the Rev. Prof. Henslow, in his Report to the British Association on the Formation of Typical Collections; and by Prof. Morris in his Catalogue of British Fossils.
