Non-Euclidean Geometry (Dover Books on Mathematics)

Stefan Kulczycki

Non-Euclidean Geometry (Dover Books on Mathematics) Stefan Kulczycki

This accessible approach features two varieties of proofs: stereometric and planimetric, as well as elementary proofs that employ only the simplest properties of the plane. A short history of geometry precedes a systematic exposition of the principles of non-Euclidean geometry.

Starting with fundamental assumptions, the author examines the theorems of Hjelmslev, mapping a plane into a circle, the angle of parallelism and area of a polygon, regular polygons, straight lines and planes in space, and the horosphere. Further development of the theory covers hyperbolic functions, the geometry of sufficiently small domains, spherical and analytical geometry, the Klein model, and other topics. Appendixes include a table of values of hyperbolic functions.

From reader reviews:

Viola Hassell:

Now a day people that Living in the era everywhere everything reachable by interact with the internet and the resources within it can be true or not require people to be aware of each details they get. How a lot more to be smart in obtaining any information nowadays? Of course the answer then is reading a book. Looking at a book can help people out of this uncertainty Information especially this Non-Euclidean Geometry (Dover Books on Mathematics) book because this book offers you rich facts and knowledge. Of course the knowledge in this book hundred per cent guarantees there is no doubt in it you know.

Mary Deemer:

Spent a free time and energy to be fun activity to complete! A lot of people spent their down time with their family, or their own friends. Usually they carrying out activity like watching television, going to beach, or picnic from the park. They actually doing same task every week. Do you feel it? Do you wish to something different to fill your personal free time/ holiday? Could possibly be reading a book can be option to fill your no cost time/ holiday. The first thing you will ask may be what kinds of publication that you should read. If you want to test look for book, may be the reserve untitled Non-Euclidean Geometry (Dover Books on Mathematics) can be good book to read. May be it might be best activity to you.

Victor Green:

People live in this new day time of lifestyle always make an effort to and must have the extra time or they will get great deal of stress from both day to day life and work. So , once we ask do people have spare time, we will say absolutely yes. People is human not only a robot. Then we ask again, what kind of activity do you have when the spare time coming to a person of course your answer will unlimited right. Then do you try this one, reading textbooks. It can be your alternative inside spending your spare time, typically the book you have read will be Non-Euclidean Geometry (Dover Books on Mathematics).

Lynnette Jennings:

Is it a person who having spare time after that spend it whole day by watching television programs or just lying down on the bed? Do you need something totally new? This Non-Euclidean Geometry (Dover Books on Mathematics) can be the reply, oh how comes? A book you know. You are consequently out of date, spending your extra time by reading in this completely new era is common not a geek activity. So what these books have than the others?
