Digital Image Processing and Analysis: Human and Computer Vision Applications with CVIPtools, Second Edition

Scott E Umbaugh

Digital Image Processing and Analysis: Human and Computer Vision Applications with CVIPtools, Second Edition Scott E Umbaugh

Whether for computer evaluation of otherworldly terrain or the latest high definition 3D blockbuster, digital image processing involves the acquisition, analysis, and processing of visual information by computer and requires a unique skill set that has yet to be defined a single text. Until now.

Taking an applications-oriented, engineering approach, **Digital Image Processing and Analysis** provides the tools for developing and advancing computer and human vision applications and brings image processing and analysis together into a unified framework.

Providing information and background in a logical, as-needed fashion, the author presents topics as they become necessary for understanding the practical imaging model under study. He offers a conceptual presentation of the material for a solid understanding of complex topics and discusses the theory and foundations of digital image processing and the algorithm development needed to advance the field.

With liberal use of color through-out and more materials on the processing of color images than the previous edition, this book provides supplementary exercises, a new chapter on applications, and two major new tools that allow for batch processing, the analysis of imaging algorithms, and the overall research and development of imaging applications. It includes two new software tools, the Computer Vision and Image Processing Algorithm Test and Analysis Tool (CVIP-ATAT) and the CVIP Feature Extraction and Pattern Classification Tool (CVIP-FEPC).

Divided into five major sections, this book provides the concepts and models required to analyze digital images and develop computer vision and human consumption applications as well as all the necessary information to use the CVIPtools environment for algorithm development, making it an ideal reference tool for this fast growing field.

From reader reviews:

Susan Swain:

In this 21st centuries, people become competitive in most way. By being competitive currently, people have do something to make these people survives, being in the middle of typically the crowded place and notice by simply surrounding. One thing that at times many people have underestimated this for a while is reading. Sure, by reading a book your ability to survive enhance then having chance to stand up than other is high. For you who want to start reading a book, we give you that Digital Image Processing and Analysis: Human and Computer Vision Applications with CVIPtools, Second Edition book as starter and daily reading e-book. Why, because this book is greater than just a book.

Bessie Starns:

In this era globalization it is important to someone to get information. The information will make professionals understand the condition of the world. The healthiness of the world makes the information better to share. You can find a lot of recommendations to get information example: internet, classifieds, book, and soon. You can view that now, a lot of publisher that will print many kinds of book. The book that recommended to you is Digital Image Processing and Analysis: Human and Computer Vision Applications with CVIPtools, Second Edition this publication consist a lot of the information on the condition of this world now. This book was represented so why is the world has grown up. The terminology styles that writer make usage of to explain it is easy to understand. The writer made some research when he makes this book. That's why this book suited all of you.

Ronald Smith:

A lot of publication has printed but it is different. You can get it by world wide web on social media. You can choose the most effective book for you, science, comedy, novel, or whatever by searching from it. It is known as of book Digital Image Processing and Analysis: Human and Computer Vision Applications with CVIPtools, Second Edition. You'll be able to your knowledge by it. Without causing the printed book, it could add your knowledge and make anyone happier to read. It is most significant that, you must aware about reserve. It can bring you from one place to other place.

Gary Wells:

Many people said that they feel weary when they reading a publication. They are directly felt the idea when they get a half areas of the book. You can choose the actual book Digital Image Processing and Analysis: Human and Computer Vision Applications with CVIPtools, Second Edition to make your reading is interesting. Your current skill of reading ability is developing when you including reading. Try to choose easy book to make you enjoy you just read it and mingle the sensation about book and reading especially. It is to be very first opinion for you to like to start a book and examine it. Beside that the guide Digital Image Processing and Analysis: Human and Computer Vision Applications with CVIPtools, Second Edition can to

be your new friend when you're really feel alone and confuse with what must you're doing of this time.
