Pro JSF and Ajax: Building Rich Internet Components (Expert's Voice in Java) Jonas Jacobi, John R. Fallows

Pro JSF and Ajax shows you how to leverage the full potential of JavaServer Faces (JSF) and Ajax. This is not an entry-level tutorial, but a book about building Ajax-enabled JSF components for sophisticated, enterprise-level rich Internet applications. Written by JSF experts and verified by established community figures including **Adam Winer** (member of the JSF Expert Group, Java Champion), **Kito D. Mann** (JSFCentral.com and JSF in Action), and **Matthias Weßendorf** (MyFaces), this JSF 5-compatible book provides reliable and groundbreaking JSF components to help you exploit the power of JSF in your Java web applications.

This book provides a blueprint for building custom JSF user interface components and shows how to leverage the best browser technologies, such as Ajax, Mozilla XUL and Microsoft HTC, to deliver rich Internet applications.

This book covers standard best practices for behavioral and renderer-specific component classes, renderers, events and event listeners, and JSP tag handlers for each. It also covers advanced techniques such as dynamic content type negotiation, JAR-based resource delivery, and dynamic render kit selection.

Foreword

"Does the world really and truly need another JavaServer Faces book?

I was fairly well convinced the answer could only be a resounding 'no!' After all, there's a good half dozen books out in stores today, by a whole host of web luminaries, and I've even personally helped as a technical reviewer on half of those. So what more could really be said on the subject?

But when I thought about this a bit more, it became clear that all of these books only go so far. They'll show you how to use what JSF gives you out of the box, throw you a bone for writing your own components and renderers, maybe even a bit more. But none that I've seen get to the heart of why JSF is really and truly cool and important technology; they make JSF look like YAMVCF (Yet Another Model-View-Controller Framework) for HTML—more powerful here and there, easier to use in many places, a bit harder to use in others, but really nothing major. And certainly nothing that takes us beyond the dull basics of building ordinary-looking web applications.

This book goes a lot further. It'll cover the basics, of course, and show you how to build components, but then it keeps going: on to AJAX, on to HTC, on to XUL—and how you can wrap this alphabet soup up underneath the heart of JSF, its component model, and how you can leverage it to finally develop web applications that don't need radical re-architecting every time the winds of client technologies blow in a different direction. Along the way, you'll learn a wide array of open source toolkits that make web magic practical even when you're not a Javascript guru.

So, heck, I'm convinced. The world does need another JSF book."

—Adam Winer, Architect, ADF Faces, JSF Expert Group Member, and Java Champion. (From the Foreword)

From reader reviews:

Nancy Rush:

The book Pro JSF and Ajax: Building Rich Internet Components (Expert's Voice in Java) has a lot of knowledge on it. So when you check out this book you can get a lot of benefit. The book was authored by the very famous author. The writer makes some research before write this book. That book very easy to read you can get the point easily after looking over this book.

Geneva Richardson:

Pro JSF and Ajax: Building Rich Internet Components (Expert's Voice in Java) can be one of your starter books that are good idea. We recommend that straight away because this e-book has good vocabulary that can increase your knowledge in language, easy to understand, bit entertaining but nevertheless delivering the information. The article author giving his/her effort that will put every word into enjoyment arrangement in writing Pro JSF and Ajax: Building Rich Internet Components (Expert's Voice in Java) although doesn't forget the main position, giving the reader the hottest along with based confirm resource info that maybe you can be certainly one of it. This great information can drawn you into brand-new stage of crucial contemplating.

Ella McCoy:

Would you one of the book lovers? If yes, do you ever feeling doubt when you find yourself in the book store? Attempt to pick one book that you never know the inside because don't judge book by its handle may doesn't work at this point is difficult job because you are scared that the inside maybe not seeing that fantastic as in the outside appearance likes. Maybe you answer might be Pro JSF and Ajax: Building Rich Internet Components (Expert's Voice in Java) why because the wonderful cover that make you consider regarding the content will not disappoint you actually. The inside or content is definitely fantastic as the outside or maybe cover. Your reading sixth sense will directly direct you to pick up this book.

John Kirk:

As we know that book is significant thing to add our understanding for everything. By a reserve we can know everything we would like. A book is a range of written, printed, illustrated as well as blank sheet. Every year seemed to be exactly added. This guide Pro JSF and Ajax: Building Rich Internet Components (Expert's Voice in Java) was filled with regards to science. Spend your extra time to add your knowledge about your science competence. Some people has distinct feel when they reading any book. If you know how big advantage of a book, you can sense enjoy to read a e-book. In the modern era like now, many ways to get book you wanted.
