Practical Applications of Evolutionary Computation to Financial Engineering: Robust Techniques for Forecasting, Trading and Hedging (Adaptation, Learning, and Optimization) Hitoshi Iba, Claus C. Aranha

"Practical Applications of Evolutionary Computation to Financial Engineering" presents the state of the art techniques in Financial Engineering using recent results in Machine Learning and Evolutionary Computation. This book bridges the gap between academics in computer science and traders and explains the basic ideas of the proposed systems and the financial problems in ways that can be understood by readers without previous knowledge on either of the fields. To cement the ideas discussed in the book, software packages are offered that implement the systems described within.

The book is structured so that each chapter can be read independently from the others. Chapters 1 and 2 describe evolutionary computation. The third chapter is an introduction to financial engineering problems for readers who are unfamiliar with this area. The following chapters each deal, in turn, with a different problem in the financial engineering field describing each problem in detail and focusing on solutions based on evolutionary computation. Finally, the two appendixes describe software packages that implement the solutions discussed in this book, including installation manuals and parameter explanations.

From reader reviews:

Aimee Simmons:

Nowadays reading books become more than want or need but also work as a life style. This reading routine give you lot of advantages. The advantages you got of course the knowledge the particular information inside the book this improve your knowledge and information. The knowledge you get based on what kind of guide you read, if you want get more knowledge just go with schooling books but if you want really feel happy read one together with theme for entertaining for example comic or novel. The particular Practical Applications of Evolutionary Computation to Financial Engineering: Robust Techniques for Forecasting, Trading and Hedging (Adaptation, Learning, and Optimization) is kind of publication which is giving the reader capricious experience.

Phil Garcia:

Reading a book tends to be new life style in this era globalization. With reading through you can get a lot of information that can give you benefit in your life. Together with book everyone in this world can certainly share their idea. Guides can also inspire a lot of people. Lots of author can inspire their reader with their story or their experience. Not only situation that share in the ebooks. But also they write about advantage about something that you need illustration. How to get the good score toefl, or how to teach children, there are many kinds of book which exist now. The authors nowadays always try to improve their expertise in writing, they also doing some investigation before they write for their book. One of them is this Practical Applications of Evolutionary Computation to Financial Engineering: Robust Techniques for Forecasting, Trading and Hedging (Adaptation, Learning, and Optimization).

Caroline Hagemann:

People live in this new morning of lifestyle always attempt to and must have the spare time or they will get large amount of stress from both daily life and work. So , when we ask do people have time, we will say absolutely of course. People is human not only a robot. Then we ask again, what kind of activity do you have when the spare time coming to a person of course your answer will certainly unlimited right. Then do you ever try this one, reading textbooks. It can be your alternative in spending your spare time, the actual book you have read is Practical Applications of Evolutionary Computation to Financial Engineering: Robust Techniques for Forecasting, Trading and Hedging (Adaptation, Learning, and Optimization).

Michael Anderson:

As we know that book is important thing to add our understanding for everything. By a reserve we can know everything we want. A book is a set of written, printed, illustrated or even blank sheet. Every year was exactly added. This guide Practical Applications of Evolutionary Computation to Financial Engineering: Robust Techniques for Forecasting, Trading and Hedging (Adaptation, Learning, and Optimization) was

filled with regards to science. Spend your spare time to add your knowledge about your technology competence. Some people has distinct feel when they reading some sort of book. If you know how big selling point of a book, you can really feel enjoy to read a publication. In the modern era like today, many ways to get book you wanted.
