Structure and Bonding: RSC (Tutorial Chemistry Texts)

Jack Barrett

Structure and Bonding: RSC (Tutorial Chemistry Texts) Jack Barrett

Structure and Bonding covers introductory atomic and molecular theory as given in first and second year undergraduate courses at university level. This book explains in non-mathematical terms where possible, the factors that govern covalent bond formation, the lengths and strengths of bonds and molecular shapes. Throughout the book, theoretical concepts and experimental evidence are integrated. An introductory chapter summarizes the principles on which the Periodic Table is established, and describes the periodicity of various atomic properties which are relevant to chemical bonding. Symmetry and group theory are introduced to serve as the basis of all molecular orbital treatments of molecules. This basis is then applied to a variety of covalent molecules with discussions of bond lengths and angles and hence molecular shapes. Extensive comparisons of valence bond theory and VSEPR theory with molecular orbital theory are included. Metallic bonding is related to electrical conduction and semi-conduction. The energetics of ionic bond formation and the transition from ionic to covalent bonding is also covered. Ideal for the needs of undergraduate chemistry students, Tutorial Chemistry Texts is a major series consisting of short, single topic or modular texts concentrating on the fundamental areas of chemistry taught in undergraduate science courses. Each book provides a concise account of the basic principles underlying a given subject, embodying an independent-learning philosophy and including worked examples.

From reader reviews:

Ruth Powers:

The book untitled Structure and Bonding: RSC (Tutorial Chemistry Texts) contain a lot of information on that. The writer explains your ex idea with easy technique. The language is very straightforward all the people, so do not really worry, you can easy to read that. The book was written by famous author. The author brings you in the new period of literary works. It is easy to read this book because you can read more your smart phone, or product, so you can read the book inside anywhere and anytime. In a situation you wish to purchase the e-book, you can open their official web-site as well as order it. Have a nice learn.

Amy Tharp:

As we know that book is very important thing to add our information for everything. By a book we can know everything we wish. A book is a range of written, printed, illustrated or blank sheet. Every year ended up being exactly added. This guide Structure and Bonding: RSC (Tutorial Chemistry Texts) was filled about science. Spend your time to add your knowledge about your scientific disciplines competence. Some people has several feel when they reading the book. If you know how big benefit from a book, you can really feel enjoy to read a reserve. In the modern era like at this point, many ways to get book that you wanted.

Jeffrey Cooks:

Publication is one of source of know-how. We can add our knowledge from it. Not only for students but in addition native or citizen need book to know the revise information of year to year. As we know those guides have many advantages. Beside we all add our knowledge, also can bring us to around the world. By book Structure and Bonding: RSC (Tutorial Chemistry Texts) we can consider more advantage. Don't someone to be creative people? For being creative person must like to read a book. Just choose the best book that suitable with your aim. Don't be doubt to change your life at this book Structure and Bonding: RSC (Tutorial Chemistry Texts). You can more appealing than now.

Edith Manning:

Some individuals said that they feel fed up when they reading a reserve. They are directly felt the item when they get a half elements of the book. You can choose the particular book Structure and Bonding: RSC (Tutorial Chemistry Texts) to make your reading is interesting. Your current skill of reading expertise is developing when you just like reading. Try to choose straightforward book to make you enjoy to see it and mingle the impression about book and reading through especially. It is to be first opinion for you to like to open a book and go through it. Beside that the reserve Structure and Bonding: RSC (Tutorial Chemistry Texts) can to be your friend when you're really feel alone and confuse using what must you're doing of this time.
