Ethics of Environment and Development: Global Challenge, International Response

Ethics of Environment and Development: Global Challenge, International Response

How can we make ethical decisions about our environment in the face of increasingly conflicting needs and opinions? This collection of essays offers a wide range of viewpoints representing many of the world's cultural and religious traditions to help readers better make such determinations for themselves. The authors seek to clarify the ethical principles surrounding the concept of "sustainable development." They provide a synoptic overview of the contemporary moral challenge of sustainable development and the similarities and differences in its interpretation throughout the world. In bringing together contributions by authorities in environmental ethics and developmental ethics, and by those who are addressing these questions from the perspectives of religion and humanistic philosophy, the book develops the concept of sustainability as the ethical approach to reconciling the needs of environmental conservation with economic development.
